STUDENT DETAILS USING PYTHON

Name : JAYAGURUNATHAN J
Reg No : 411625149016
Department : B.E CSE (Cyber Security)
Subject : PYTHON
Batch : 03

AIM:

To write a simple Python program to get and display student details using a looping statement.

PROCEDURE

:Step 1: Start the program.
Step 2: Ask the user to enter the number of students.
Step 3: Use a for loop to repeat the process for each student.
Step 4: Inside the loop, get the student's name.
Step 5: Get the student's age.
Step 6: Get the student's college name.
Step 7: Get the student's department.
Step 8: Get the student's state.
Step 9: Display all the entered student details.
Step 10: Stop the program.

PROGRAM CODE:

```
# Student Details

n = int(input("Enter number of students: "))

for i in range(n):

    print("\nStudent", i+1)

    name = input("Name: ")

    age = input("Age: ")

    college = input("College: ")

    department = input("Department: ")

    state = input("State: ")

    print("\n--- Student Details ---")
```

```
print("Name:", name)

print("Age:", age)

print("College:", college)

print("Department:", department)

print("State:", state)
```

OUTPUT:

```
Enter number of students: 1

Student 1
Name: Jguru
Age: 18
College: PRINCE DR K VASUDEVAN COLLEGE OF ENGINEERING AND TECHONOLOGY
Department: CSE(CYBER SECURITY)
State: TAMIL NADU

--- Student Details ---
Name: Jguru
Age: 18
College: PRINCE DR K VASUDEVAN COLLEGE OF ENGINEERING AND TECHONOLOGY
Department: CSE(CYBER SECURITY)
State: TAMIL NADU

=== Code Execution Successful ===
```

RESULT:

Thus, the Python program to get and display student details using a looping statement was successfully executed.
